Assignments:

- April 2: (in a week)
  The 2nd version of your main project program is due. (will be graded) This version should be the complete program. You will need this program to be able to get results (see next item). Please feel free to ask, if you need any help. Put your 2nd version of your program into your `~/share.dir/` and give read permission.

- April 7: 1st Version of Results due; this means figures. Also for discussing what you might want to measure, please feel free to ask.

- April 2: Mini-Project II: This will happen fully in class, you will not get homework for this (because everybody is very busy with their main project).

- April 9: 2nd Version of Results due.
