

Introduction to Python Programming

Dr. Joshua Stough

June [3,6,7] 2016

Course Information

- **Variables, and Assignment (data storage)**
- **Expressions, and Data Retrieval**
- **Conditional statements (making choices)**
- **Loops (repetition)**
- **Functions (procedural abstraction)**
- **Structured data, list/dict (data abstraction—
encodes state)**

6 Fundamental Concepts a Language Implements

- **Variables, and Assignment (data storage)**
- **Expressions, and Data Retrieval**
- **Conditional statements (making choices)**
- **Loops (repetition)**
- **Functions (procedural abstraction)**
- **Structured data, list/dict (data abstraction—encodes state)**
