

RESC 098 TECHNOLOGY EQUALS PROGRESS?

Week 9 assignments

Read the article, “Do Artifacts Have Politics?” by Langdon Winner.

Writing Assignment 9A:

Prepare a short paper, between 400 and 500 words, on either the ‘pro’ or ‘con’ side of your final project. Be sure that your claim appears clearly in the first paragraph and refer to information from two distinct references. List your references on the back of your single sheet.

Use the template containing the rubric and bring a hard copy to Tuesday’s class.

Reading Assignment 9B:

Winner’s article is an example of a scholarly paper that requires deep reading. Submit your annotations on this article at the end of Tuesday’s class.

Journal Entry 9:

Before Monday midnight, examine two of the many ideas arising in Winner’s paper about the connection between technologies and human values. Select one from the first section of the paper and the other from the last section. At the end of your journal entry, include a question that can become the basis for our class discussion.
